AMT Selects SAF Tehnika Phoenix Studio-To-Transmitter Solution for Innovative ENGenesis™ LTE ENG System

ENGenesis Networks Video/Audio/IP Data between ENG/EFP Units and Base Studios

Las Vegas, NY (April 24, 2017) – Accelerated Media Technologies (AMT) has chosen SAF Tehnika’s point-to-point microwave radios as the Studio-To-Transmitter (STL) backhaul solution for its ENGenesis LTE ENG System. ENGenesis 2/7GHz BAS band communications solution utilizes a single high-capacity radio channel to support simultaneous bi-directional IP based video/audio/data communications providing broadcasters with high capacity private networks. The unique bi-directional communications solution enables full remote control of IP devices in the field from a centralized studio. AMT selected SAF Tehnika’s STL solution for its ability to transmit bi-directional video, Livewire™ audio and data 100% of the time without interruption.

“SAF Tehnika offers the ideal backhaul solution to provide live ENGenesis bi-directional communications between field production units and their base studios,” said John Wood, Director of Engineering for ENGenesis, AMT. “The SAF Tehnika Phoenix STL platform also

provides TV broadcasters with an easy and cost-efficient migration path from ATSC 1.0 to ATSC 3.0.”

“We are excited to work with AMT as a Value Added Reseller and provide the final piece of the point-to-point communications link for their innovative ENGenesis LTE newsgathering solution,” said Janis Bergs, President, SAF North America.

About Accelerated Media Technologies, Inc.

Accelerated Media Technologies Inc. (AMT) is the premier manufacturer of custom broadcast, command, and specialty vehicles and communications technologies such as the company’s revolutionary ENGenesis bi-directional 2/7GHz BAS band communications solution. AMT, the undisputed leader in mobile solutions worldwide, continues to refine the role and form factor of conventional news vehicles and has consistently introduced patented and exclusive technologies to evolve news acquisition to a new level. AMT is headquartered in Auburn, MA with facilities Haverhill, MA, Long Island City, NY, Upland, CA and Tampa, FL. Learn more at www.acceleratedmt.com.

About SAF

SAF Tehnika JSC is an ISO certified wireless data transmission equipment manufacturer. The company's products are produced in Latvia, European Union and sold in over 130 countries worldwide. North America sales and support is served by SAF North America, a subsidiary of SAF Tehnika with its headquarters and warehouse in Aurora, Colorado. SAF Tehnika has been listed on NASDAQ Riga stock exchange since 2004. Learn more at www.saftehnika.com
